Refrigerated and heating circulators

ENGLISH

## MAGIO™. The best for your laboratory.

From research institutes to industrial companies, laboratories around the world need high performance circulators for challenging temperature applications. The high-end circulators in the MAGIO range have been specially developed by JULABO with pioneering technologies for these requirements and are manufactured to the highest quality standards in Germany.

With the MAGIO range we offer our customers high-end devices in the highest performance class for the working temperature range from -50 °C to +300 °C. On all models, the wetted parts are made from stainless steel. In combination with high-performance pumps, this makes the circulators particularly suitable for challenging external applications. The high resolution touch display guarantees simple, intuitive operation and optimal visibility of all relevant functions. Thanks to the proven JULABO premium quality, all models meet the highest standards in terms of precision, reliability, and functionality.

With a wide selection of accessories, all MAGIO instruments can be tailored to customer-specific applications in a modular and individual way. Modern interfaces and an integrated programmer complete the intelligent design of the MAGIO models.

## The advantages at a glance.

### Everything made of stainless steel.

The highest level of quality and material compatibility. All parts that come into contact with the medium are made of stainless steel.

### Touch display. Perfect control.

A high resolution TFT touch display means that the operator always has an eye on all values and functions. The intuitive menu structure makes easy control possible.

### Maximum safety.

The classification III according to DIN12876-1 makes safe operation possible, even with flammable liquids. Automatic shut-off in case of high temperature or low liquid level.

### Filling level. Monitored.

Level indicator of the bath medium on the display.

### Energy-saving

The high-quality insulation of all relevant components saves energy.

### Many interfaces.

Simple remote control, data management and integration into process structures. USB, RS232 and ethernet are permanently integrated.

### Multilingual.

The complete menu navigation is available in multiple languages.

### Programmer. Integrated.

The integrated programmer allows automatic running of temperature time profiles.

### Environmentally friendly.

Units with this symbol work with environmentally friendly, natural refrigerants.

### Temperature. Under control.

External Pt100 sensor connection for highly precise measurement and control directly in the external application.

**Powerful pump.**

The integrated pressure/suction pump with performance values of 0.92 and -0.4 bar is the strongest in its class and is continuously adjustable.

**Power  
PUMP**
JULABO  
exclusive**Analog I/O.**

Analog interfaces for integration into process control systems (accessories).

**Process stability.**

Early visual and acoustic notification of critical conditions increases process safety.

**Process. Under control.**

Full supervision of the control dynamics. Access to all important control parameters for individual process optimisation.

**Highest measuring accuracy.**

'Absolute Temperature Calibration' for manual compensation of a temperature difference, 10-point calibration.

**Intelligent temperature control.**

Intelligent Cascade Control – automatic and self-optimizing adjustment of the PID control parameters with external constancy of  $\pm 0.05^{\circ}\text{C}$ .

**Condensation protection.**

Superb design solution. Integrated ventilation directs air over the bath lid and minimizes condensation.

**Stable. Mobile.**

Perfect stability thanks to rubber feet. Additionally integrated casters means that even the large, high-performance JULABO circulators are easy to handle.

**Connection. Easy.**

Inclined pump connections (M16x1) facilitate the connection of applications. Each unit includes 2 barbed fittings of 8/12 mm diameter each.

**Space saving.**

Place your JULABO circulators right next to an application, another unit, or wall. This saves space. A lack of vents and connections on the side makes it possible.

# Refrigerated circulators

**Refrigerated / heating circulators** of the MAGIO range are perfect for precise, reliable temperature control of demanding external applications. The devices are designed to surpass the requirements of laboratories and institutions around the world with their application of modern technology and high quality.

## Refrigerated circulators

### MAGIO MS refrigerated/heating circulators

for working temperatures from -50 °C to +200 °C

As with all circulators from the MAGIO range, the refrigerated circulators stand out thanks to their premium quality, high performance and intuitive operation. The devices offer extra strong pressure and suction pumps, thus fulfilling the highest demands for temperature control of external applications. Whether in basic research, material testing or technical systems – the MAGIO refrigerated circulators offer high-tech solutions for high customer requirements.

- Ideal for demanding external applications
- Simple control of complex applications
- Continuously adjustable, extremely powerful pressure / suction pump
- Flow rate 16 ... 31 l/min, pressure 0.24 ... 0.92 bar, suction 0.03 ... 0.4 bar
- Large, high-resolution TFT touch display with multilingual user interface
- Parts being in contact with the medium made of stainless steel
- Integrated programmer
- External Pt100 sensor connection
- USB interface
- RS232 interface
- Ethernet interface
- Analog interfaces (accessories)
- Classification III according to DIN 12876-1

### MAGIO MS and MX bridge mounted circulators

for working temperatures from +20 °C to +300 °C

MAGIO bridge mounted circulators combine high temperature performance with maximum flexibility. The adjustable bridge allows the circulators to be used with bath tanks up to a filling volume of 100 liters.

- Immersion depth of 200 mm (MX-Z) and 150 mm (MS-Z)
- Strong heating capacity of 3 kW (MX-Z) and 2 kW (MS-Z)
- Extendable stainless steel bridge from 33 to 68 cm
- Ideal for demanding external applications
- Simple control of complex applications
- Continuously adjustable, extremely powerful pressure / suction pump

### High resolution TFT touch display

The modern TFT touch display gives you all the important information at a glance. Three large, predefined main screens clearly display data and graphics with various application priorities. Menu navigation is self-explanatory, arranged by relevance to daily operations and easy to operate with the touch of a finger. The in-built help function provides detailed support in case of additional questions.

<sup>1)</sup>For applications near or below ambient temperature: use a cooling coil or JULABO immersion cooler.

## Heating circulators

### MAGIO MS and MX heating circulators

for working temperatures from +20 °C to +300 °C

MAGIO heating circulators feature professional technology for the most demanding applications. The systems have been designed to provide precise temperature control to external applications. However samples can also be temperature-controlled inside the high-quality insulated, closed bath tank.

- Models for internal and external applications from 3 to 26 liters
- Ideal for demanding external applications
- Simple control of complex applications
- Continuously adjustable, extremely powerful pressure / suction pump
- Large color TFT touch display, multi-lingual user interface
- Stainless steel parts in contact with the medium
- Flow rate 16 ... 31 l/min, pressure 0.24 ... 0.92 bar, suction 0.03 ... 0.4 bar
- Integrated programmer
- External Pt100 sensor connection
- USB interface
- RS232 interface
- Ethernet interface
- Analog interfaces (accessories)
- Classification III according to DIN 12876-1
- High-quality thermal insulation of the bath tanks
- Built-in drain tap for easy and safe drainage

We offer a comprehensive range of accessories to adapt the MAGIO heating circulators to your individual application (racks, tubing, adapters, and more).

### JULABO Thermal bathfluid

JULABO Thermal bath fluids have been carefully selected after long-term testing. They are ideally suited for all temperature control applications guaranteeing safe and reliable operation. Choosing the proper bath fluid is critical for high performance temperature control. The viscosity and heat conductivity of the Thermal fluids are specifically selected for use with JULABO MAGIO temperature control instruments.

#### Advantages

- Wide temperature ranges
- Low viscosity
- High stability
- Good heat conductivity
- Minimum odor
- Long fluid life

#### Working temperature ranges

#### Makes routine laboratory work easier

JULABO Thermal bath fluids are delivered in containers with a handy drain tap.

#### JULABO Thermal bath fluids based on silicone ...

... are chemically inert substances which do not affect metals like iron, copper, zinc, aluminum, chrome or nickel. Compared to other fluids, JULABO Thermal fluids have an extraordinarily low electrical conductivity. When properly stored, the fluids will last for 12 months and longer as they are not susceptible to climatic influences.

#### JULABO Thermal bath fluids based on water-glycol ...

... (monoethylenglycol with anti-corrosion additives) have excellent thermal characteristics and a low viscosity. In addition, they provide anti-freeze protection, i.e. they can be applied at temperatures below the freezing point of water.

2 310 120	IQ/OQ Documentation, Category 2	MAGIO

## Maintenance

Order No.	Description	Suitable for
2 350 102	Maintenance JULABO Units, Category 2 Maintenance includes preventive measures that help to maintain functionality, to minimize downtime as well as costs. A JULABO maintenance comprises works such as visual inspection, cleaning, functional test and includes a maintenance report.	MAGIO

# The **Julabo** advantages at a glance.

## JULABO temperature control solutions – high-precision and speed

JULABO products include high-quality temperature control solutions to cover the temperature range -95 °C to +400 °C.

### Refrigerated circulators

JULABO refrigerated circulators are suitable for internal and external applications and can be used within the temperature range -95 °C to +200 °C.

### Water baths and shaking water baths

JULABO water baths and shaking water baths can be used for a variety of applications within the temperature range +18 °C to +99.9 °C.

### Heating circulators

Heating circulators are available in various designs including heating immersion circulators, heating circulators with open bath, and heating circulators to cover a temperature range from +20 °C to +300 °C.

### Additional products

In addition, the JULABO product portfolio offers instruments for special requirements such as calibration baths, beer forcing test baths, immersion/flow-through coolers and temperature controllers.

### Highly dynamic temperature control systems

The highly dynamic temperature control systems from JULABO can be used for demanding temperature applications ranging from -93 °C to +400 °C. The PRESTO series offers unique high-performance specifications to meet these requirements.

### Wireless communication & software solutions

JULABO facilitates the automation of applications. The temperature control instruments can be comfortably controlled and monitored via PC.

### Recirculating coolers

The high degree of efficiency of JULABO recirculating coolers makes them an environmentally-friendly and economic alternative to tap water cooling in the temperature range -25 °C to +130 °C.

### Accessories

An extensive range of accessories allows for adaptation of JULABO products for research and industry use.

## Comprehensive service and on-site support

JULABO takes pride in offering customers expert advice for pairing the proper JULABO temperature control solution to their specific application. JULABO service and support options include installation and calibration, equipment qualification documentation and application training. These invaluable services ensure customer confidence in the operation and maintenance of any JULABO unit.

## Custom requirements - custom products

JULABO's wide range of products provide a solution for almost any application. If no standard product can be used for a specific requirement, our specialists will work out a custom solution together with you.

**JULABO. Quality.**

Highest quality standards to ensure a long product life.

**Green technology.**

Deliberately engineered with environmentally friendly materials and technologies.

**Satisfied customers.**

11 subsidiaries and more than 100 partners worldwide guarantee fast and qualified JULABO support.

**100 % checked.**

100 % testing. 100 % quality. Every JULABO product is shipped to customers after a successful final inspection.

**Quick start.**

Individual JULABO consultation and detailed manuals get your instruments up and running on site.

**Services 24/7.**

Around the clock availability. You can find suitable accessories, data sheets, manuals, case studies and more at [www.julabo.com](http://www.julabo.com).
